Average age of vines: 10 years

Plant density (vines/ha): 4,400

Production per vine: 2 Kg/plant

Production per hectare: 8 tons/Ha

Treatments in the vineyard: Copper and Sulphur as required

Fertilizers: Organic manure in pellets as required, green manure with barley, clover and leguminous

Harvesting method: Manual

Certifications: BIOAGRICERT

Fattoria San Donato

Chianti Colli Senesi DOCG

Oenology

Selection of the grapes in the vineyard, de-stalking and pressing. Maceration for 12-14 days at a maximum temperature of 30°C in stainless steel tanks. Maturing and spontaneous malo-lactic fermentation in concrete tanks. It spends 6 months here in contact with yeasts that undergo regular batonage to maintain them in suspension.

Natural stabilisation, blending following organoleptic control of the most suitable components and light pre-bottling filtration.

At least 6 months' bottle ageing.

Number of bottles produced: 20,000

Type of bottle: 750 ml and 375 ml Bordeaux bottle
